

In the last week leading up to the Spring Equinox, you become aware that a large warband of Feni has been taking the trod south from King's Stoke in Upwold, then joining the trod leading west into the Mournwold. They appear to be travelling as one large group and attack any small groups of Navarr they come across with unrelenting force. This would strongly indicate that they are purposefully travelling from Upwold into the Mournwold for unknown reasons.

You are free to roleplay that you discovered this information in one of the following ways:

- Walking one of these trods yourself, and discovering tracks which you have interpreted
- Finding injured Navarr on the trods who were attacked by the Feni and asking for their story
- Hearing about the Feni movements from other Brands you met on the trods or at a striding

It is not appropriate to roleplay that you personally encountered this Feni warband whilst they were travelling.

You may instead choose not to have discovered the above information before the event.
