

**Physick:** Fluid in the brain is building up. The pressure must be relieved through trepanning.

**Untreated Information:** If this would is not treated within five minutes, your head will burst.

Rip Here

*This card can be opened by someone with the Physick skill*

*You collapse and go into shock. You have an intense headache: your skull feels like it is under great pressure and is uncomfortably hot*

Rip Here

**Physick:** the patient has a sleeping sickness of unknown origin. There is no cure. The patient will certainly die within weeks to months.

The hallucinations are connected to the patients fears: the more the patient fears death, the more their final days will be utterly horrific.

Rip Here

*This card can be opened by someone with the Physick skill*

*You are caught between wake and sleep, suffering hallucinations. You sometimes believe that you are in the Labyrinth of Ages, being tortured by the Creator.*
