

*General Erkenbrand of Tyrsholm,*

*Our scouts have reported that a group of Thule have performed a ritual at the Face of Ikka in Summersuaq. There is a small Night Regio there that they seem to be guarding. They stand under a Black Dragon Banner, which may be related to one of the Thule Dragons.*

*It seems that this ritual took place before the Autumn Equinox, so I do not know whether there is any more information that could be found there. I think that we left Suaq scouts in watching at that time, and they have the tactical knowledge of a dead fox.*

*There are other Thule troops in the area, and I know that the civil service have been investigating the troop's movements especially about a group known as The Black Heart of Karsk, but I do not think that the two things are related.*

*If you can find a conjunction to the Face of Ikka, then you might be able to send a group to find out what they are doing, and maybe find out what the ritual was about. If there is not a conjunction there, we will try to send some troops and report back to you.*

*For the Steinr and Wintermark*

*Loviisa Akselisdottir*
